EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Caridi on 30 June 2008.

THE FOLLOWING AS BEEN AMENDED BY AN EXAMINER'S AMENDMENT:

IN THE ABSTRACT

Replace the abstract filed 06/23/2004 with

-- The present invention also relates to a liquid processing device. The present invention includes hexagon nut shaped material pieces of stainless steel the like which are heat-treated and oriented such that the material pieces form up into a kind of concentric circles and made on a single plane, with drawing lines linking the center points of the hexagonal nut shaped material pieces positioned the outermost circumferentially periphery of the concentric arrangement forming up into an equilateral hexagon and such arrangement is retained. Also, a liquid processing device comprises a hollow container that the material pieces are positioned within. ---

IN THE TITLE

The title has been changed to -- LIQUID PROCESSING DEVICE AND METHOD OF MANUFACTURING PROCESSED LIQUID—.

The amendment was made in order to place the specification in better form for publication.

EXAMINER REMARKS / COMMENTS

2. The following is an examiner's REMARKS/COMMENTS:
 - a. The substitute specification filed 04/09/2008 is approved and has been entered along with the changes indicated in the Examiner's Amendment (above).

The claims filed 04/09/2008 has amended the invention "A liquid processing device".

The amended specification now characterizes the field of invention to a more precise embodiment, in particular, a liquid processing device. The specification points out a structural arrangement which processes a liquid flowed therethrough as the asserted utility, see the substitute specification page 13, lines 17 through page 15, line 2.

b. As a matter of Patent Office practice, a specification which contains a disclosure of utility which corresponds in scope to the subject matter sought to be patented must be taken as sufficient to satisfy the utility requirement of § 101 for the entire claimed subject matter unless there is a reason for one skilled in the art to question the objective truth of the statement of utility or its scope.

A specification disclosure which contains a teaching of the manner and process of making and using the invention in terms which correspond in scope to those used in describing and defining the subject matter sought to be patented must be taken as in compliance with the enabling requirement of the first paragraph of § 112 unless there is reason to doubt the objective truth of the statements contained therein which must be relied on for enabling support.

Sufficient evidence of utility of the processing of a liquid has been found by the examiner as supported in the specification filed 04/09/2008.

c. It is noted that the previous remaining outstanding issue, in the office mailed 01/09/2008, had raised an issue under 35 USC 101 as to the claims

lacking a credible utility as a “field” converter for fluids. A rejection made under 35 USC 112, 1st paragraph was also made as to a lack of enablement of the operation of a field conversion as discussed in the original specification, (section FIELD OF INVENTION).

d. Whereas the instant claims and specification are directed to a fluid processing device, 35 USC 101, and 35 USC 112, 1st paragraph issues to a “field” conversion of fluid has been rendered moot.

e. The Applicant’s own Declaration filed Under 37 CFR 1.132 on 04/09/2008 by NOMURA, and Declaration filed 02/27/2007; and the Declaration filed by WATARAI (on 4/9/2008); and the Declaration filed by kenei MAN (or aka kenei NAN on 04/09/2008); and the Declaration filed by Takao (on 02/27/2007), providing a statement attesting that the patents US 3747656, and/or US 3424437 and JP09010776 does not show or suggest the arrangement of the specification/application has been fully reviewed and noted. However, there is no outstanding rejection under those references. Additionally, there is no direct comparison of the prior art to that of the instant claims. As such, the statement to the showing or suggestion of the prior art to the application/ specification as stated in the respective declarations are moot to the outstanding issues.

f. Additionally, each of the above Declarations filed under 37 CFR 1.132 has submitted respectively authored papers for consideration. With regards, to applicant's own authored papers, there is a question doubt of self interest in the results of those papers. With regards to the papers of the other authors it is

noted that there is no statement of independence, nor a statement of no vested interest with that of the applicant.

g. Additionally, the issues of a "field" and its "conversion" has not been addressed in each of the papers. There is no measurement of any field nor a showing of field changes. Thus an asserted utility of a "field converter" has not been sufficiently rebutted. *However, a review of the application as a whole, does suggest a utility of a device accepting liquid thereby processing liquids flowing therethrough the device.* This utility is in accordance to, and corresponds in scope, to the subject matter of the apparatus claims presented for patent protection. The apparatus claims has been found as distinguishing over the prior art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4867233, US 3265128, US 2466684, US 2793835, US 7240723.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony G. Soohoo whose telephone number is (571) 272 1147. The examiner can normally be reached on 8AM-5PM, Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Sample can be reached on 571-272-1376. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
